

ANIKET RAJ

Full Stack Developer | MERN Stack | React.js | Node.js

aniketraj8832@gmail.com | +91-9304050380 | linkedin.com/in/aniket-raj-aiml | github.com/AR-AniketRaj | Ghaziabad, Uttar Pradesh

About Me

Full Stack Developer specialising in MERN stack with two shipped, production-grade web applications. Proven ability to design RESTful APIs, integrate third-party services, implement secure authentication, and deliver responsive UIs — independently and on schedule. Focused on writing clean, maintainable code that solves real user problems at scale.

Technical Skills

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, EJS, Chart.js

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Passport.js, Session Management

Databases: MongoDB, Mongoose, SQL

Tools: Git, GitHub, Postman, Jest, npm, VS Code

Concepts: MVC Architecture, CRUD, Agile, OOP, Data Structures & Algorithms, Responsive Design

Projects

Full Stack Developer

Investify — Stock Market Analytics Platform | Jan 2024 – May 2024

- Reduced portfolio tracking time by consolidating 3 live financial APIs into a unified real-time dashboard, enabling instant price monitoring and investment insights per user.
- Handled full data lifecycle across 10+ RESTful endpoints — from JWT-secured login to MongoDB portfolio CRUD — consistently achieving sub-200ms API response times.
- Transformed raw market data into interactive Chart.js visualisations, giving users actionable stock trend summaries without requiring external analytics tools.

Full Stack Developer

Wanderlust — Accommodation Booking Platform | Jun 2024 – Nov 2024

- Delivered a complete host-to-guest booking workflow — listings, search, reservations, and reviews — covering all core user journeys in a single deployable application.
- Eliminated authentication vulnerabilities by implementing Passport.js OAuth and session management, with Mongoose relational schemas enforcing data integrity across entities.
- Achieved full cross-device compatibility on mobile, tablet, and desktop by engineering responsive Bootstrap and EJS templates, validated across multiple viewport sizes.

Education

B.Tech — Computer Science & Engineering (AI & Machine Learning)

Dr. A. P. J. Abdul Kalam Technical University, Lucknow | Expected May 2028

Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, OOP, DBMS, Artificial Intelligence, Machine Learning.

Notable Achievements

- Architected and shipped two full-stack applications as a solo developer, covering system design, API development, database modelling, and UI delivery end-to-end.
- Integrated production-grade financial market APIs and implemented JWT-secured multi-user authentication — capabilities that directly map to professional fintech and SaaS roles.
- Designed a normalised MongoDB schema with Mongoose supporting relational queries across users, listings, bookings, and reviews — demonstrating database design maturity beyond CRUD.
